

## Library Management System

Overview: The User can login and use the service and, can only Access purchased books. The user can buy or rent new books.

General description:

- 1) User
- 2) User can manage books in their inventory
- 3) User can also sell books in library

Methods

Classes:

- 1) User → selectbook(), name(), LibraryID()
- 2) Books → Page(), 77 details(), Volume(), Bookname(), Author()
- 3) Author → Author details()
- 4) Payment → SelectPayment()
- 5) selectCategory → Book(category)
- 6) Rent or purchase → Payment(), Rent(), Purchase()
- 7) Library Database Access → Username()
- 8) Library staff → Library ID()

functional Requirements :-

1) Registration: User has to Scan his ID to system for further Authorisation

2) Reservation:

2) Access books: User can be able get his required books and can also select volume and edition

3) Library Manage Access: The User ID, libID and books that have been purchased will be stored to Managers Database

4) Recommendation: The system should recommend User new books depending on the topic of interest

5) Membership plan: User can purchase the monthly or weekly or yearly membership

6) Catalog: The book will be arranged according to the details

### Interface Requirements:

Software Interface: software uses APIs to communicate with other systems.

User Interface: User must made be accessible with different plans with different number of acceptance & resource. A web interface for library management system manage member data, history section to find books.

Communication interface: SMS / Email / integration for registration and payment confirmation.

### Non-functional requirements :-

- 1) logging time & the Access time:
- 2) Security requirements :- Like unauthorised Access of books by user and unwanted Access should be avoided and handled
- 3) Scalability requirements :- All books should be available to other all users i.e after payment.
- 4) Reliability: user should be able to select required books easily
- 5) Should have less response time
- 6) App Compatibility

### Project Estimation :-

1) Books cost : 1000000

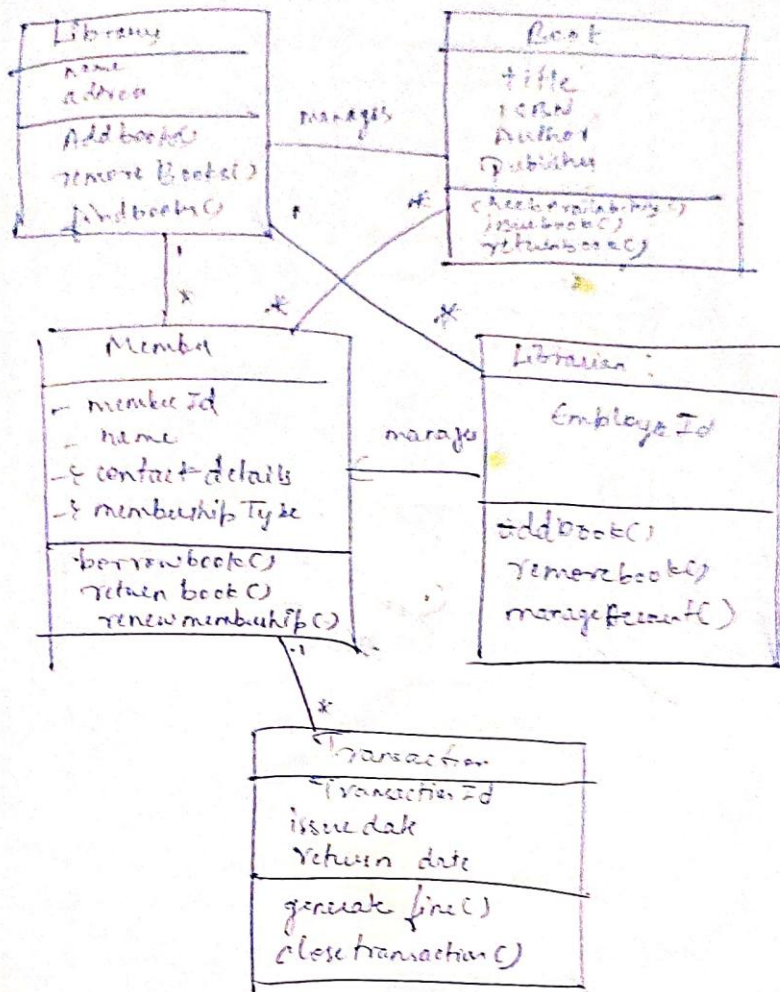

2) Programme cost: 10\$ per LOC , 130000 LOC

Total cost  $\Rightarrow$  1300,000 \$

Overall cost : 1000000 + 1300000  
 $\Rightarrow$  1,400,000 \$  
1.4m\$
